SKY AGRICULTURE

2027 RANGE

SEEDING · FERTILISATION · SOIL CULTIVATION

SINCE 1936 — 90 YEARS

MORE VERSATILE, MORE PRECISE, MORE EFFICIENT.

FALCON T
7 minutes to change product without tools

PROGRESS TF
4 products in a single pass

P 180 TINE SEEDING UNIT
3 L/ha of diesel when drilling

X40 / X50
Up to 9% less fertiliser

David GUY,
Farmer and Managing Director
of SKY Agriculture

MORE VERSATILE, MORE PRECISE, MORE EFFICIENT

We all know the context. Our role is to provide practical solutions for energy, fertilisation and climate-related challenges.

More resilient farms require more versatile machines, such as our front hopper solution, which adapts to different crops and products; greater precision, because at current fertiliser prices, section control and continuous weighing quickly pay for themselves; and lower non-road diesel consumption, with our new LSP 180 seeding unit or our rotary harrows with 4 rotors/m (up to 15% less fuel). As a French and European manufacturer, we remain focused on what drives your margins.

Sulky becomes SKY: the name changes, the commitment remains.

4 REASONS TO INVEST THIS SEASON

UP TO -9%
fertiliser savings
with ECONOV

THE BRAND IS EVOLVING, BUT OUR VALUES AND TEAMS REMAIN UNCHANGED.

THE SAME FAMILY
The Burel Group, a French family-owned company, remains at the helm.

THE SAME TEAMS AND THE SAME FACTORIES
Designed and manufactured in France and Europe by the same teams.

THE SAME DEALER NETWORK AND THE SAME PARTS
Your dealer and the support for your Sulky machine remain unchanged.

Sulky becomes Sky.

EASYDRILL W6020

EASYDRILL 3M

Mechanical seed drill available with 2 hoppers in 3M and 4M.

Drill up to 4 different products ,
at 4 different application rates, with 2 separate sowing depths

SERIES 6

MAXIDRILL

THE FAST SEED DRILL FOR ALL CONDITIONS

The Maxidrill can operate on shallow- or deep-cultivated soils, or in direct drilling conditions.

MAXIDRILL 4020

MAXIDRILL W4020

NEW

SERIES 6

6th generation, a new benchmark: the Easydrill and Maxidrill Series 6 seed drills incorporate numerous innovations, including:

Remaining capacity management: see in real time how much product remains in each hopper and the area that can still be covered before refilling.

Intelligent tramlining (TRAMLINE Control): the seed drill automatically knows when to create tramlines, regardless of the order in which passes are made across the field, for simple operation with no risk of error.

P120 SEEDING UNIT

THE KEY TO PERFORMANCE

SULKY becomes **SKY**

NEW RANGE

PRE-SEASON CONDITIONS

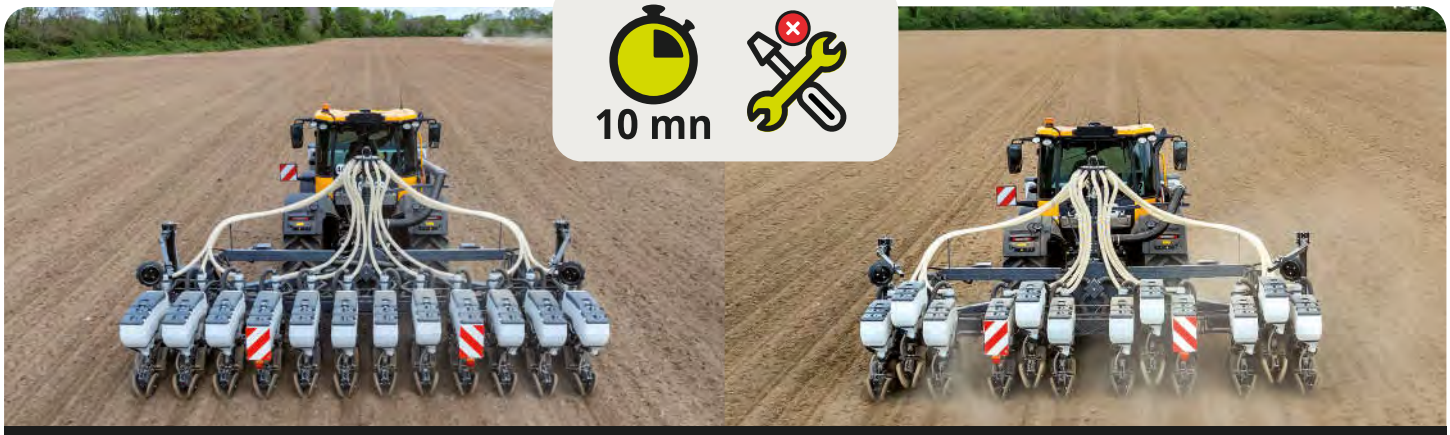

SONIC

FLEXIBILITY & SPEED

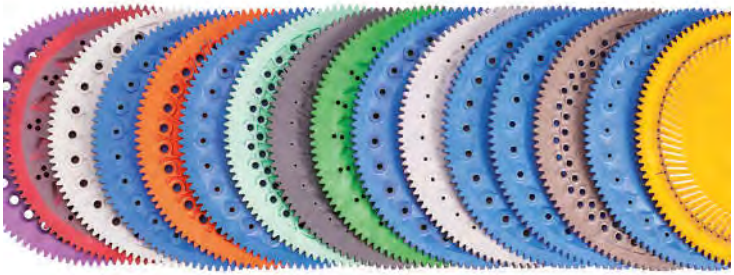

POWERED BY Precision Planting®

9° disc to limit weed emergence by minimising soil disturbance

Row Motion technology allows row spacing to be changed directly in the field without removing the seeding units. It makes it easier to move between crops requiring different row spacings using a single machine. A solution designed to provide greater flexibility and responsiveness when organising field operations.

+ 16 DISCS

Thanks to a wide choice of discs and an interchangeable selector, the seed drill can easily adapt to a broad range of seed types, allowing you to change your crop rotation without constraint.
